# SALINA LEGACY PARK FUND

To help insure that future generations in Salina will have a well developed park system that everyone can enjoy, the Salina Tree Advisory Board and the City of Salina are establishing the Salina Legacy Park Fund. This program will enable private citizens or groups to donate money for the funding of small park enhancement projects that will benefit all park users. These projects will range from creating small gardens and landscaped areas to accessible fishing areas and walking paths. The type of projects is endless, but all will add to the beauty and accessibility of our park system. Each year the Park and Recreation Department with approval of the Salina Tree Advisory Board and the Salina Parks and Recreation Committee will select two or three projects that could be funded through the Salina Legacy Park Fund. Donors will be able to choose the project they would like their money to go to. A small brass leaf will be added to the donor tree at the City County Building to recognize each donation and the project itself will be signed that it was funded in part by the Salina Legacy Park Fund.

## 2014 PROJECTS

### Trail Enhancements

**Goal: \$8,000**

Over the last few years, the City has developed and improved a number of trails. New trails have been constructed in Bill Burke and Indian Rock Parks, and on the south side of town. The existing levee trail has been improved in various areas. However, many of these areas lack enhancements. This project area would provide benches, waste receptacles, and landscaping to create an enjoyable place to relax and to enhance the appearance of the trail.

### Entrance at Oakdale Park

**Goal: 3,000**

This project would completely redesign the northeast entrance to Salina's oldest and most developed park. This area has long needed landscaping that would be attractive and compliment the existing Oakdale Botanical Gardens. The use of perennial flowers, shrubs, and trees, in addition to a new lighted park sign would make it a more sustainable landscape.
