

SUBJECT: **Dedicated circuits for add-on bathrooms**

EFFECTIVE DATE: October 25, 2010

INTERPRETATION NUMBER: ADM – 4.0210.11

SEE ALSO: 2005 NEC – Article 210.11(c)(3)

INTERPRETATION SUMMARY

This article of the electrical code requires that branch circuits serving outlets for bathrooms in dwellings must be dedicated 20 amp circuits. It is the interpretation of this department that this requirement applies to all new bathrooms even those being built in existing construction. The exception to this would be in the case where the existing breaker or fuse box is already full and there is no way to combine circuits to free one for the bathroom.
