### DECK REQUIREMENTS

#### Is a building permit required?

Yes, a building permit is required to construct either a *covered* deck (regardless of the height above grade) or an uncovered deck *more than 30" above ground level*. Applications may be submitted to the Building Services Department 300 West Ash, Room 201 from 8 to 5 weekdays.

### What should the building plans show?

- 1. Pier size and location.
- 2. Location of stairs
- 3. Size of material of posts, beams and joists.
- 4. Size, height and spacing of guardrails and spindles.
- 5. Indicate whether or not the deck will be covered and if so, the materials used. For example, wood trusses and composition shingles.

#### What should be shown on the site plan?

- 1. Property address and legal description.
- 2. Property dimensions.
- 3. All easements on the property.
- 4. Location of all permanent structures.
- 5. The location of the deck, including the distance from all property lines. (Note whether deck will be covered)

# Building plans should be drawn to scale. Normal scaling is $\frac{1}{4}$ " per foot for the building plan and 1"=20' or 1"=30' for the site plans.

#### **Building Regulations**

# The following list includes most, but not necessarily all, of the building code and land use regulations for decks.

- 1. All covered decks must maintain the same setbacks as the primary structure- typically 7.5' sideyard and 25' rear yard. Uncovered decks must maintain a 3' sideyard setback. No decks may be built in a drainage or utility easement.
- 2. Footings and piers must extend 30" below grade and bear on undisturbed soil.
- 3. A guardrail is required when the deck is more than 30" above grade.
- 4. One square foot of footing or pier is necessary for each 40 square feet of uncovered deck.
- 5. Handrails are required on at least one side of stairs and all open sides. Handrails are not required if there are 3 or less risers in the set of stairs.
- 6. Guardrails and stair railings shall have intermediate rails, or an ornamental pattern, close enough so that a 4" ball cannot pass through them.
- 7. Stairs shall have a maximum rise of 8" and a minimum step of 9" with a handrail of 34" to 38" above the nosing of the step. Stair risers shall be closed so that a 4" sphere cannot pass between the treads.
